

# Relational Databases with MySQL Week 8 Coding Assignment

Points possible: 70

| Category      | Criteria  | % of Grade |
|---------------|---|------------|
| Functionality | Does the code work?   | 25         |
| Organization  | Is the code clean and organized? Proper use of white space, syntax, and consistency are utilized. Names and comments are concise and clear. | 25         |
| Creativity    | Student solved the problems presented in the assignment using creativity and out of the box thinking.                                       | 25         |
| Completeness  | All requirements of the assignment are complete.  | 25         |

**Instructions:** Using a text editor of your choice, write the queries that accomplishes the objectives listed below. Take screenshots of the queries and results and paste them in this document where instructed below. Create a new repository on GitHub for this week's assignments and push this document to the repository. Additionally, push an .sql file with all your queries to the same repository. Add the URL for this week's repository to this document where instructed and submit this document to your instructor when complete.

## Coding Steps:

Write queries to address the following business needs.

1. I want to know how many employees with each title were born after 1965-01-01.
2. I want to know the average salary per title.
3. How much money was spent on salary for the marketing department between the years 1990 and 1992?

## Screenshots of Queries:

```
1 • select count(birth_date) as "Born after 1965-01-01", titles.title from employees
2
3 inner join titles on titles.emp_no = employees.emp_no
4 group by title having count(birth_date) > '1965-01-01';
5
6 • select t.title, avg(salary) as "Average Salary" from titles t
7 inner join salaries s
8 on t.emp_no = s.emp_no group by title;
9
10 • SELECT sum(s.salary) as "Money spent of Salary" , d.dept_name
11 FROM salaries s
12 INNER JOIN dept_emp dep ON dep.emp_no = s.emp_no
13 INNER JOIN departments d ON d.dept_no = dep.dept_no
14 WHERE dept_name = "Marketing" AND dep.from_date >= '1990-01-01' AND dep.to_date <= '1992-12-31'
15 GROUP BY d.dept_name
16
17
18
19
```

## Screenshots of Query Results (only include the last 20 rows):

Result Grid | Filter Rows: | Export: | Wrap Cell Contents: |

| Born after 1965-01-01 | title              |
|-----------------------|--------------------|
| 97750                 | Senior Engineer    |
| 107388                | Staff              |
| 115002                | Engineer           |
